

Muhammad Yousuf 邱樹富

Software Developer – Technical Support | Hong Kong Permanent Resident 香港永久性居民
work.myouusuf@gmail.com | +852 4679 1016 | www.yousuf.life | www.github.com/ypathan | www.linkedin.com/in/ypathan

PROFILE

Full-stack developer with 2 years of part time and 1 year of full time(3 years) production experience across backend, frontend, infrastructure and delivery, including systems for the **HK Correctional Services Department** and the **Hong Kong Monetary Authority**. **AWS-certified** (Solutions Architect Associate and Cloud Practitioner) and Databricks-accredited and BSc Computer Science graduate. I design, build, deploy and operate reliable systems end-to-end, with full ownership and minimal supervision. Fluent in English and Cantonese.

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate** | AWS | Oct 2026 – Oct 2029 | ID: f3146f9a9ff84fceb39b65f8d9bdaf0d
- **AWS Certified Cloud Practitioner** | AWS | Jul 2025 – Jul 2028 | ID: a46446883220485aa2c9a17063c829aa
- **Academy Accreditation – Databricks Fundamentals** | Databricks | Oct 2026 | ID: 196191556

TECHNICAL SKILLS

Languages	Go (Golang), Java, Python, SQL, JavaScript, HTML, CSS, C#, Typescript, PHP
Backend	Spring Boot, Spring Security, Flask, Node.js (Express), REST API design, JWT authentication, Hibernate, J2EE, Java Enterprise, Jboss. .NET Framework, Spring MVC, SIT
Frontend	Responsive React.js and Bootstrap, EJS, REST API integration, authentication flows, jQuery, JSP, JSTL
Real-time & AI	WebSockets, real-time messaging, event-driven workflows; DeepFace, Face API.js, AI-powered pipelines
Databases	MySQL, PostgreSQL, MongoDB, Firebase (Realtime DB / Auth), schema design, query optimisation, Oracle SQL
Cloud & DevOps	AWS (EC2, IAM, S3, networking), Terraform / Infrastructure as Code, real cloud deployments, Linux administration, Docker, Dokploy, CI/CD
Data Engineering	Data pipelines (ETL), Python, SQL, Spark / Databricks notebooks, web scraping (Selenium, BeautifulSoup), data aggregation, Lotus Notes, Outlook
Automation	Workflow automation, Odoo ERP scripting, ETL-style processing, scheduled jobs
Security	Authentication & authorisation design, secure API design, Windows 7/8/10/11 support and patching, PC LAN Support, M365 Support

PROFESSIONAL EXPERIENCE

Developer (Full-Time) – A Bit Digital Limited, Tsuen Wan, Hong Kong **Sep 2025 – Sep 2026**

Developer (Part-Time) – A Bit Digital Limited, Tsuen Wan, Hong Kong **Jul 2024 – Aug 2025**

- Development, maintenance, System Integration Testing and documentation of a full-stack Knowledge Management portal for the **HK Correctional Services Department** (Spring Boot, ReactJS, MySQL), a high-accountability government client.
- Maintained and updated the **Hong Kong Monetary Authority** website, ensuring compliance and uptime for a tier-1 financial regulator. Reviewing Code for Colleagues.
- Engineered multi-source web scraping pipelines (BeautifulSoup, Selenium, playwright) aggregating data at scale for business intelligence.
- Using Langchain along with fine-tuning language models to perform Retrieval-Augmented Generation (RAG) for a personal information obfuscation system pipeline.
- Working with LLMs, n8n, meta APIs to develop workflows to assist clients with SEO and social media automation

Programmer – Proactive Technology Limited, Chai Wan, Hong Kong **Jun 2024 – Aug 2024**

- Sole developer of a production real-time order tracking system (Python/Flask, Firebase, Odoo ERP), delivered end-to-end from design to deployment following the agile software development methodology. Testing Software in UAT environment. Monitoring Application through logs, Grafana and prometheus and performing data patching.
- Automated 3+ Odoo workflows via custom scripting, cutting manual processing time by ~40%; managed live servers and websites with zero operational disruption.

Programmer – Biomed Technology Holdings Limited, HKSTP **Sep 2023 – May 2024**

- Provided full helpdesk and desktop support for Windows 7,8,10,11 users, PC/notebook/monitor setup, OS imaging, software re-installation, workstation relocation, antivirus checks, data backup, inventory, problem/change logging, Microsoft Office(M365) troubleshooting, and meeting room/network equipment support, with recommendations to improve PC and network performance.

SELECTED PROJECTS

- **Real-Time Unified Messaging Platform** – Node.js, WebSockets, MongoDB, EJS. Direct/group chat plus video and voice calls with call signalling and media streaming. github.com/ypathan/chat-ejs-node
- **Distributed Multi-Vendor Marketplace** – Spring Boot, Spring Security, React. Stateless JWT auth with role-based access for buyer, seller and admin; cart and checkout flow. github.com/ypathan/e-commerce-backend
- **Terminal Journaling System** – Go, Bubble Tea, Docker, Dokploy CI/CD. Offline-first TUI app published via Homebrew ([brew info ypathan/journal/journal/](https://brewinfo.ypathan.com/journal/journal/)).
- **Face Recognition Attendance System** – DeepFace, Face API.js, REST API. Real-time face scanning with automatic attendance logging into Moodle LMS. yousuf.life/projects/face.html

EDUCATION

University of Wollongong – Bachelor of Computer Science **Sep 2024 – Jul 2025**

UOW College Hong Kong – Associate of Science in Information Systems Development **Sep 2021 – Jul 2024**

HKDSE English Level 5, ICT Level 3 | GCSE Chinese A*, GCE Chinese A
